

FELINE Skin Disease

Diagnostic Evaluation

Inflammatory Skin Conditions

Feed Prescription Diet® d/d® Feline pet food long term

plus appropriate treatment (e.g., anti-parasitic) if required, until complete resolution

Prescription Diet® Hypo-Treats are specially formulated for use with this product

Suspected Adverse Reaction to Food

Elimination Food Trial (3–10 weeks)

Feed **Prescription Diet® z/d® Feline ULTRA (can) pet food** and/or **Prescription Diet® z/d® Feline Low Sensitivity (dry) pet food**

Prescription Diet® Hypo-Treats are specially formulated for use with this product

Disappearance of clinical signs indicates food allergy (dietary challenge would confirm). Manage on one of two regimens:

Maintain on Prescription Diet® z/d® Feline ULTRA (can) pet food and/or Prescription Diet® z/d® Feline Low Sensitivity (dry) pet food

No recurrence of signs – continue to feed long term

Prescription Diet® Hypo-Treats are specially formulated for use with this product

Change to Prescription Diet® d/d® Feline pet food

No recurrence of signs – continue to feed long term

Prescription Diet® Hypo-Treats are specially formulated for use with this product
